

Mobile Power - When and Where You Need It

The Taurus™ 60 Mobile Power Unit is the prime choice if you're looking to produce reliable, low-cost, on-site peaking power. Designed as an on-site generator system to optimize service for seasonal or cyclical loads, the Taurus 60 Mobile Generator System includes these key features:

Easy to Install and Relocate

- Highway Transportable
- Modular Design for Quick Set-Up and Connection
- No Concrete Foundation Required
- Compact Footprint to Minimize Space Requirements
- Ideal for Rental Fleets and Utility Equipment Pools

Environmentally Friendly

- Low Emissions State-of-the-Art SoLoNOx™ Dry Low NOx Combustion System
- No Visible Emissions
- Sound Attenuation Package for Quiet Operation
- Low Profile Design to Minimize Installed Height
- Easy to Permit

Flexible Solution

- Leasing and Rental Options Available
- 5-MW Size for Highly Flexible Capacity Addition and Operation
- Fuel Flexibility, Gas or Diesel with Dual Fuel Option

Complete Systems Solution

- Set-Up and Commissioning
- Site Preparation (If Needed)
- Ancillary Support Systems (If Needed)
- Wide Range of Product Support Programs

Operational Features

- Dispatchable to be On Line in Six Minutes (from cold start)
- Range of Control System Options for Remote Operation and SCADA Integration
- Utility Grade Switchgear and Protective Relay Module
- KVAR Control for Excellent Reactive Power Capability
